## Lincoln Hills Photography Club Website Color Specifications

This document presents the chosen “Color Pallet” to be used with the website. It provides illustrations of the tools provided by the WIX Editor to apply the colors to the various elements that comprise the various web pages. These elements include, but are not limited to: Typefaces, Container Boxes, Shapes, Frames, and so forth.

The Color Pallet was chosen to provide a range of colors that would work well with the overall page design and page background. A Medium Grey was chosen for the Page Header, Footer and Page Background. The page color is specified as White. Orange has been specified as the “Spot” or “Accent” color and is primarily used with selected typefaces, shapes, and navigational aides like buttons and page “Link” indicators.

The principal color scheme, therefore, is basically: Grey, White and Orange. The Grey and White “PRINCIPAL” colors were chosen because the website is a Photography Website, and they do not detract from the photographs displayed on the site. Grey is also use as the Page Color for the Home Page and the Main “GALLERIES” Page.

Additional “SECONDARY” colors are available to differentiate various sections or elements within a page and to help segment content into organized spaces that facilitate communication and comprehension. These additional Secondary colors include: Teal, and Yellow. Their use is almost exclusively reserved for Container Boxes and Shapes. Only on very rare occasions should they be used for type or Page Color.

A fourth “TERTIARY” Red color, is also available and should only be used as an “Alert” color that can be used to emphasize urgency or extremely important topic. In this case it should only be applied to a shape (star, asterisk, arrow etc.) or occasionally a simple 1, 2 or 3 word phrase such as: “Attention!!” “Important News Flash!” etc.

Because this is a photography website the Secondary colors should never be used with a high degree of saturation. Typically they should only be used in a soft almost transparent saturation in order to not conflict with the overall color scheme and more importantly to not overpower the photographs presented on the page.

The rest of this document will provide additional guidance on the application of color for the site.

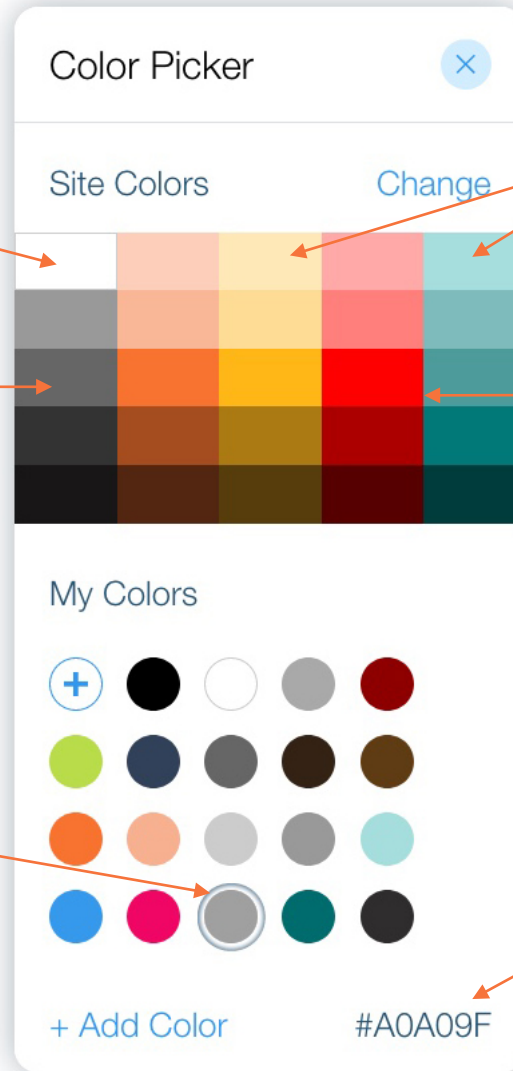

# Lincoln Hills Photography Club Website Color Palette

Pictured is the WIX Color Picker provided by the WIX Editor. It is the default color panel used whenever specifying a color for a page element.

White is the specific color for the Web Page.

Medium Grey is the specified color for the Header, Footer and Page Background.

**NOTE:** in this illustration a custom color of Light gray which is a variant of the Website specified Gray has been selected. See circled gray dot. Notice the ASCII Internet (#A0A09F) code for the color in the lower right hand corner of the panel.

Yellow and Teal are the specified Secondary colors to be used primarily with container boxes and shapes.

Red is a Tertiary color and should only be used very sparingly to "alert" the reader to some important information. It should only be used with a shape or a simple 1, 2, or 3 word phrase.

The ASCII code is the number your browser uses to replicate the color on the page on your computer.

## Lincoln Hills Photography Club Website Color Palette

Presented below is the website color palette with the ASCII codes for each color.

#FFFFFF	#FCCFBC	#FFE7BB	#FFAAAA	#A8DEDD

#333333	#A44D27	#AA7922	#AA0000	#047978
#181717	#522614	#553D11	#550000	#023C3C
#000000				

## Lincoln Hills Photography Club Website Color Palette

### Color Specifications for Headline, Sub-headlines and Body Copy.

Black is the Primary Color for Body Text, Headlines, Photo Captions and Labels. Dark and Medium Gray can also be used for the above categories of text, but should be used very sparingly and only for artistic effect.

Orange is the Primary Accent Color for the website, and as such is used primarily for adding color to text which is being employed as a Sub-Headline. The color Orange provides good contrast against a light background making it highly legible. It should never be used for Body Text (text set in paragraph form). When using Orange to color text the Medium Orange (ASCII #F6733B) should be used.

Below is a screen capture showing examples of a Headline in Black and a Sub-Headline in Orange. Notice the drop-shadow treatment to both lines of type. This is an optional style and not a requirement.

Headlines are always set in Black #000000

**The Photo Club is comprised of residents of the Sun City Lincoln Hills community in Lincoln, CA.**

*Presented below is a list of our monthly meetings and activities for September 2017*

Sub-Headlines are primarily set in Orange #F6733B

Below is screen capture showing an example of Body Text set in Black.

Throughout the year Lincoln Hills Photography Club members showcase their photographs at various venues within the greater Sacramento area. Three venues, located right here in Lincoln, are: Umpqua Bank, Simple Pleasures Restaurant and Buonarroti Ristorante. Other exhibition opportunities include The Art League of Lincoln, with a gallery in the heart of downtown.

The subject of Headlines and Sub-Headlines structure and form will be discussed in a separate Specification Document. This discussion is limited to the application of color to text.

## Lincoln Hills Photography Club Website Color Palette

The Secondary Colors of Yellow and Teal are used primarily to add color to Container Boxes or Shapes

The ability to add color to the Container Boxes facilitates the separation or differentiation of news articles on the same page. The overarching design theme of the Website is to have a "Background color" of medium dark gray color so that it visually becomes "negative" space, and therefore does not compete with the rest of the site for the attention of the viewer.

The site design objective was to lightly use the Secondary Colors to allow for better comprehension but not to overpower the important content (news articles and photos) placed on the page. To that end the Yellow and Teal colors applied to Container Boxes, should be used in a very un-saturated (pale) way. The colors applied to small shapes (buttons, arrows, filagree etc.) can be use in a high level of saturation for example, Yellow #FFB633 and Teal #509B9A.

This is accomplished by starting with a base color Yellow #FFE7BB and Teal #A8DEDD and reducing the opacity of the color to make it appear lighter as the white page color bleeds through. This approach eliminates color drift when adding color to a Container Box. Opacity is control in the "Design Tool" and is expressed as a percentage value of the starting color.

Most of the Color in the Container Boxes used on the NEWS page should be calibrated in the range of between 15% and 40% of the Yellow #FFE7BB and Teal #A8DEDD colors.

## Color Specifications for Basic “New Page”

The WIX Editor will automatically generate a New Page with the correct color scheme.

The White color used for the Page can be changed to Medium Gray, Dark Gray or Black when used with a Gallery Page.

**Lifestyles Photography Group builds on experience to support future Ride-To-Walk fund raising events.**  
*We've posted three photo galleries to showcase the events.*

*By: Jim Cormier Co-Lifestyles Coordinator*

A few months ago, the Lincoln Hills Lifestyles Event Photography Group stepped up and provided photography support for the Third Annual Lincoln Lions Club Special Kids Day. The event was hosted at the Ride-To-Walk facility on HWY 193.

The photos and Hi-Def Blu-ray slideshow presentation we provided Bob Olin of the Lincoln Lion's Club were very much appreciated and will be used in marketing for future Ride-To-Walk events.

Our services have again been requested to cover another upcoming event that is to be held at the Ride-To-Walk facility sometime around the May time frame. This event is the Ride-To-Walk - Beer & Wine Tasting Festival.

It is anticipated that there will be approximately 500 people in attendance. This event is to raise money to support the fantastic services that the Ride-To-Walk organization provides to special needs children of all ages and their families.

It is a pleasure for us to be working with Danielle Lawlor, PTA to do our part to capture this awesome first annual fundraising event. Danielle works in the Kilaga Springs fitness area as a trainer.

Putting on a large event like this is a first for Danielle so we are taking the knowledge we have accumulated from previous large event photo shoots, such as the Lincoln Pace Race. We will use our knowledge to provide the best photographic coverage of the event to Danielle and the owner of the Ride-To-Walk facility. We will also provide them with high quality photos that they can use in other marketing campaigns.

Take time to visit the Lifestyles Photography Group web page to see what other projects we have covered and the projects we have in the planning stages. You can get their by clicking [HERE](#)

**Past Projects:** the photos to the left are typical of the type of photography our Lifestyles Photographers produce for the various organizations they serve here in Sun City Lincoln Hills.

**Galaxy & Wildflower Photo Opportunities Highlight Tahoe Field Trip**  
*We've posted 100 photos on the July Field Trips to Tahoe and Loon Lake on the Field Trip page [HERE](#)*

Club photographers gathered in July for a favorite field trip to Lake Tahoe. The trip was a great success due to months of meticulous pre-planning. Because of all the planning efforts, members enjoyed the best locations for wild flowers and Milky Way shots. And as a bonus, members were trained in using Theodoite and PhotoPills apps. A complete packet of restaurants and lodging made sure everyone was well fed and has the best accommodations.

Even though field trips are planned by and offered for club photographers, everyone is there individually so your itinerary is your own. Many photographers pair up and split off based on specific interests. For an in-depth look at the summer Tahoe adventure, see more [HERE](#)

Summer" Replaces "Old Things" as Theme of the  
Summer Simple Pleasures Exhibit on July 24.

**BUTTERFLIES** - Photo by Don Bowden highlights the concept of the theme - "Colorful Summer" - our current exhibit at Simple Pleasures Restaurant from July 24th - October 24th.

Our current exhibit - "Colorful Summer" at Lincoln's Simple Pleasures Restaurant

The exhibit features work by Club Members: Don Bowden, Rhonda Campbell, Truman Holtzclaw, Stephanie Huntingdale, Debra Raach, Steve Stewart, Larry White and Vicki White. For a look at the current exhibit visit the Exhibit page [HERE](#)

The exhibit will be on display until October 24, 2017. Simple Pleasures is located in downtown Lincoln at 648 Fifth Street. It's a great spot for breakfast and lunch. Check out the Exhibit and support this local venue.

**VOTE FOR YOUR FAVORITE CHALLENGES!**  
Go to the Exhibits Page and cast your vote for your favorite challenges for 2018.

**California Missions**  
Don't forget our year-long challenge to photograph California Missions which ends July 1, 2018. More information available on the Exhibits page.

---

### Orchard Creek Exhibit

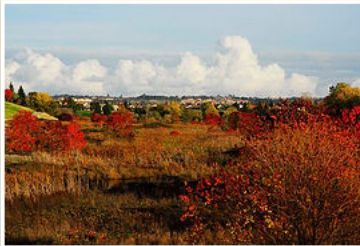

Club member photographs are currently on display in the Rotunda at Orchard Creek.  
Photographers participating in the Orchard Creek exhibit include:

**Bob Baikauskas, John Campbell, Rhonda Campbell, Bob Dale, Carole Haskell, Patrick Jewell, Mike Johnson, Kate McCarthy, Brad Senn, Steve Stewart, Larry White, Vicki White, and Jim Wronkiewicz**

For a few examples click [HERE](#)

Photo by Mike Johnson

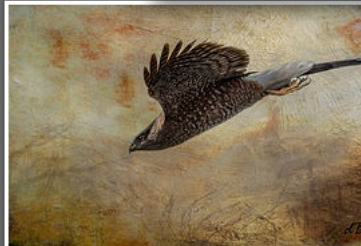

Photo by Dennis Berry

It's time to get off your duff and follow the examples set by Mike and Dennis and create your own photo gallery or refresh your current gallery with new images.

Club Member Individual Galleries have now been expanded to accommodate a total of 32 photographs.

With this expansion members who want to showcase their photos on the website have the option to present as few as four photos up to a maximum of 32 photos. The prior maximum was limited to 20 images.

Those needing guidance resizing their images should refer to the Instructions posted on the Members Page [HERE](#)

**Member Galleries now accommodate a maximum of 32 images, up from 20.**

NOTE: The Medium Grey ( ASCII Code #666666) shown above should only be used in association with photo galleries. This panel on the NEWS page relates to new images being placed in the MEMBERS GALLERY portion of the site. The Medium Grey should also be used as the PAGE color in all galleries (i.e., HOME Page, GALLERIES Page and MEMBER GALLERY Pages.

Examples showing how selecting the "Change Design" paintbrush tool is used to provide access to the Color Picker and the Opacity Slider used to set the Container Box Fill specifications.

Clicking the paintbrush provides access to the Box Designs tool pictured at right.

NOTE: The Opacity Slider is used to specify the opacity of the color #FFE7BB

The screenshot displays a website editor interface. At the top left, there is a 'Change Design' button with a paintbrush icon. Below it, a navigation bar contains the title 'Round Table and Print SIGs will be held in OC Multi-media room this September'. The main content area features two photographs: one of a group of people sitting around a table, and another of a group of people standing in front of easels. Overlaid on the right side of the editor are three panels: 'Box Design', 'Color Picker', and 'My Colors'. The 'Box Design' panel shows a 'Fill Color & Opacity' section with a 'Background' slider set to 15%. The 'Color Picker' panel shows a grid of color swatches with a yellow dot selected. The 'My Colors' panel shows a grid of color swatches with the selected yellow dot and the ASCII code #FFE7BB displayed below it. A text box at the bottom of the screenshot reads: 'NOTE: Yellow color dot has been selected and the ASCII Code #FFE7BB is displayed'. Another text box at the top right of the screenshot reads: 'NOTE: The Opacity Slider is used to specify the opacity of the color #FFE7BB'. Arrows point from these text boxes to the corresponding UI elements in the screenshot.
