

ICE Trekkers Diamond Grip Traction Cleats highly recommended.

If you spend time in the mountains or anywhere you may be walking on icy surfaces, buy a pair of these Cleats that slip over your boots or shoes. The fit needs to be tight. The sizing on Amazon is accurate. Take care to ensure you are looking at Men's or Women's sizes. These will last for years and it is a minor Investment to avoid a catastrophic slip and fall.

Yaktrax Diamond Grip is another brand highly recommended.

Note: other brands may be cheaper but lack the "Diamond Grip" spikes and can be very dangerous.

Amazon usually runs out of stock around mid-December, beat the rush and buy early. Our local REI store may have these in stock but at a higher price.
